

P2P Global Investments PLC

AN ALTERNATIVE CREDIT INVESTMENT TRUST

INVESTMENT MANAGER AND SUB MANAGER:

MW Eaglewood Europe LLP (the "Investment Manager")
MW Eaglewood Americas LLC (the "Sub Manager" and together with the Investment Manager, "MW Eaglewood")

HIGHLIGHTS

- 0.44% NAV growth in the month
- 17.30% inception to date total NAV return¹
- Continuing evolution of the portfolio towards new origination channels and secured asset classes, with more attractive risk return profiles
- Share buybacks during the month contributed 0.07% to NAV per share growth
- 38th consecutive month of positive NAV growth since inception

REVIEW OF THE MONTH

During July 2017, P2P Global Investments PLC (the "Company") returned 0.44% of NAV growth (including 0.07% impact of share buybacks). The inception to date actual NAV return for shareholders is 17.30%¹. The NAV (cum income) as confirmed by the external administrator was 998.99p at the end of July.

During the month, as part of its efforts to evolve the portfolio towards new origination channels and secured asset classes, the Investment Manager signed a new forward flow agreement with a secured lending platform.

The Investment Manager continues to further reduce US exposures through a combination of amortisation and the disposal of assets. This contributes to gradually adjusting and diversifying the portfolio towards other lending sectors where better risk-adjusted returns may be achieved. The Investment Manager continues to invest across a broad and diversified range of loans, and had almost 190,000 active loans in the portfolio at the end of July.

Equity positions currently make up 4.47% of the portfolio. Three of these equity positions were revalued during the month, with a net neutral impact on NAV.

NAV Performance

Source: MW Eaglewood Europe LLP, Bloomberg Index Services Limited, AltFi Data
The Bloomberg Barclays Multiverse Total Return Index is an unmanaged index of global investment-grade and high yield fixed-rate debt issues with maturities of at least one year. The Liberum AltFi Returns Index is designed to measure the returns generated from UK marketplace lending. The indices cannot be invested in directly and do not reflect fees and expenses. Please refer to the Important Information at the end of this document for further details.

¹ ITD: Inception to Date – Excludes Issue Costs. In June 2015 NAV return includes a 0.55% premium from a TAP issue. Until May 2017 this was reported as 0.77% which did not include the TAP issue ² Leverage multiplies both gains and losses and may increase the risk of loss of investment during a business downturn.

P2P Global Investments PLC

AN ALTERNATIVE CREDIT INVESTMENT TRUST

| Company Overview

P2P Global Investments PLC is a UK listed investment trust. The Company is focused on producing less volatile returns, investing in small ticket lending opportunities with attractive risk and reward characteristics, especially where there is illiquidity premium to be achieved.

P2P Global Investments PLC completed its initial IPO onto the LSE main market in June 2014, and following subsequent capital raises in January and July 2015, the Company entered the FTSE 250 in September 2015.

The Company specialises in investing in small size private credit assets across SME, consumer (secured and unsecured), real estate and trade finance asset classes through its relationships with low cost disintermediating online companies. These companies encompass marketplace lending platforms, balance sheet lenders and other non-bank loan originators ("Platforms"). The Company invests in the USA, Europe, Australasia, and actively seeks opportunities in other markets.

| Investment Objective

The Company's investment objective is to provide its shareholders with an attractive level of reliable dividend income through exposure to a diverse portfolio of predominantly prime private credit assets. These may include, exposure to consumer, SME, corporate and real estate loans and trade receivables, directly and indirectly originated by Platforms, in Europe, the US and Australasia. The Company targets a dividend of 6-8% annually over the long term. In addition, the Company may also make equity investments in Platforms.

| Market Opportunity

A powerful disintermediation opportunity has emerged, largely as a result of increased regulatory requirements imposed on banks. The banks' subsequent retreat from some traditional lending markets has facilitated the entry of Platforms into the financial landscape. In addition to regulation, data and technology advances are opening up small sized lending markets, previously monopolised by banks, to competition from new alternative entrants. Today's Platforms are able to take advantage of lower distribution costs, specifically in smaller size loans, to offer attractive customer propositions. The Investment Manager believes that these structural changes are leading to exciting investment opportunities in small size private credit assets by working with Platforms to circumnavigate the heavy cost structure of traditional banks. The opportunity initially took hold in unsecured consumer lending and smaller sized SME lending and is now expanding rapidly into secured lending opportunities in property and trade finance.

| MW Eaglewood

MW Eaglewood is part of the Marshall Wace group of affiliated investment managers under common control. MW Eaglewood specialises in private credit strategies with a focus on smaller ticket lending across SME, corporate, consumer, real estate and trade finance markets. Since its inception, MW Eaglewood has made significant investment in its technology, infrastructure and team and established strong relationships with some of the largest Platforms globally. MW Eaglewood was first to complete several milestones in the marketplace lending industry, employs a 26 person team, including six credit professionals, and currently manages over \$2bn of gross credit assets.

| Glossary

NAV (Cum Income) - The value of investments and cash, including current year revenue, less liabilities.

NAV (Ex Income) - The value of investments and cash, excluding current year revenue, less liabilities.

Share price - Closing mid-market share price at month end (excluding dividends reinvested).

Discount/premium - The amount by which the price per share of an investment trust is either lower (at a discount) or higher (at a premium) than the net asset value per share (cum income), expressed as a percentage of the net asset value per share.

Market capitalisation - Month end closing mid-market share price multiplied by the number of shares outstanding at month end.

Total NAV Return - The theoretical total return on shareholders' funds per share reflecting the change in Net Asset Value (NAV) assuming that dividends paid to shareholders were reinvested at NAV at the time dividend was announced.

Dividend - Reflecting the ex-dividend date during the month.

Gearing Ratio - The aggregate debt of the Company and any investee entity (on a look-through basis, proportionate to the percentage interest the Company retains in the most junior tranche of such investee entity) shall not exceed 1.5 times Net Asset Value.

Net Debt to Equity - The total debt issued directly by the Company and on a pro-rata basis to the Company's investment, the debt issued by entities owned by the Company or by entities managed by the Investment Manager, net of total cash held by the Company, divided by the Company's Net Asset Value

| Important Information

Bloomberg Barclays and Liberum AltFi Benchmarks

The benchmarks for the Company are the Bloomberg Barclays Multiverse Total Return Index (the "Multiverse") and the Liberum AltFi Returns Index ("LARI"), (the "Indices"). While there is no index that reflects the Company's strategy, the Investment Manager has chosen the Multiverse as a broadly accepted benchmark and the LARI as it tracks the NAV performance of the 4 largest Platforms in the UK and includes consumer, SME and trade finance asset classes. Certain of these Platforms may comprise a portion of the Company's portfolio.

The Multiverse Index provides a broad-based measure of the global fixed-income bond market. The index represents the union of the Global Aggregate Index and the Global High-Yield Index and captures investment grade and high yield securities in all eligible currencies. Bloomberg Index Services Limited ("BISL") is the exclusive administrator of the Bloomberg Barclays family of indices. BISL is a wholly owned subsidiary of Bloomberg L.P. and is a leading provider of benchmark indices and index solutions. BISL operates independently from Barclays Bank PLC and its affiliates.

The LARI is designed to measure the returns generated from marketplace lending. Index values are time-weighted, published as aggregate annualised returns, measuring what an equal time-weighted exposure to every loan made would have returned over a preceding 12 month period. Platforms are eligible for inclusion if they satisfy specific eligibility criteria. Currently, the index calculations are based on aggregated data from the 4 largest UK Platforms: Zopa, Funding Circle, RateSetter and Market Invoice. At the time of writing these platforms represent 71% market share of the UK marketplace lending sector per the 3 month market share measure of the Liberum AltFi Volume Index. To ensure maximum accuracy and transparency the Index is constructed using the cash flows from every loan made by the eligible platforms. The LARI is maintained by AltFi Data and sponsored by Liberum. The index is rules based with Index Committee oversight.

There are significant differences between the Company's investments and the Indices. The Multiverse is more liquid and potentially less volatile than the Company's portfolio as it includes certain historically relatively stable investments such as government bonds and U.S. certificates of deposit. In addition, securities in the Multiverse are subject to minimum par outstanding criteria for inclusion in contrast with the lower balance loans that dominate the Company's portfolio. As well, the Multiverse excludes defaulted bonds while any defaults in the Company's investments are reflected in its NAV. The LARI represents a subset of Platforms that align with the Company's strategy, however the Company has exposure to more geographic markets, asset classes, opportunities and risks. In addition, LARI's calculation treats each origination quarter as having the same amount of capital allocated to it, irrespective of the actual volume originated. In both cases, the Indices' components may be secured or unsecured, and may have materially different maturities, duration and degrees of amortization and prepayment as compared to the Company's investments. Unlike the Indices, the Company uses leverage which adds both risk and volatility to its loan portfolio. Importantly, the Indices are not managed, are not available through direct investment and are not subject to any of the management fees or expenses incurred by the Company.

The Indices are included for information purposes only. The Company does not necessarily invest in the securities which comprise the aforementioned Indices. Its performance, volatility, diversification and investment objectives may or may not correlate to the Indices, and it should not be considered a proxy for the Indices.
